

# Experiences and Views of Family Members/Supporters of UK health and social care professionals working on COVID-19

We are keen to hear from any family member (spouse, parent, child over 18) of any frontline healthcare worker who has been working on the COVID-19 pandemic (nurse, doctor, midwife, physiotherapist, OT, radiographer, **security staff**, healthcare assistant, care worker, administrator, porter, cleaner, mortuary worker or anyone working in a healthcare setting during COVID-19).

So far attention has been paid to the impact on frontline healthcare workers themselves, but no one has been paying attention to the impact that working on this pandemic is having on their families.

We want to change this and would like to invite you to take part in a one off 45-minute online interview about your experiences and views.

If you are interested in taking part, or for more information, please contact us.
